Marine submersion exposure

Climatic scenarios ENM, Storms T0, T1, T2

Assessment of Specific damages to assets at T0

Builfing of adaption strategy (« possible futures »)

Socio-economic scenarisos for T1 et T2

Assessment of adaptation capacity (T0)

Assessment of specific damages to assets at T1 and T2

Assessment of the social, economic and environmental vulnerability of the coastal system to marine inundation

Comm. Rey Valette et al Friday 9h20

- Terms
- T0=2010,
- T1= 2030,
- T2= 2100

-Specific and sectorial vulnerability indicators
-Systemic tree of vulnerability (to be done)
