

T-MEDNet: a temperature network for high resolution and long term monitoring of Mediterranean coastal waters stratification

Bensoussan N, T-MedNet group, Garrabou J.

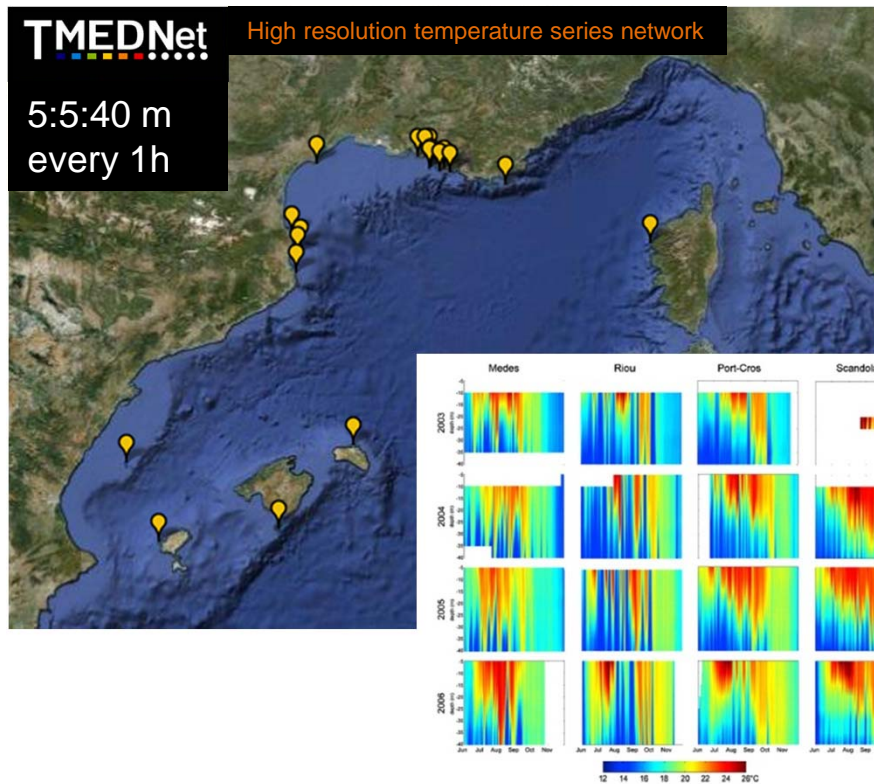

Fig. 5. Time series of daily mean T from June to November for 2003 to 2006 at Medes, Riou, Port-Cros, and Scandola.

A concerted initiative to:

- Assess thermal environment of coastal ecosystems.
- Facilitate data sharing and analysis.

To increase our ability to detect and anticipate climate change impacts at regional scale.
