

R&D Project

Assessment strategy of coastal ecosystem responses to WWTP effluents

Stellio CASAS, Benjamin DIX, Christelle PAGOTTO

Assessment strategy of coastal ecosystem responses to wastewater treatment plant effluents

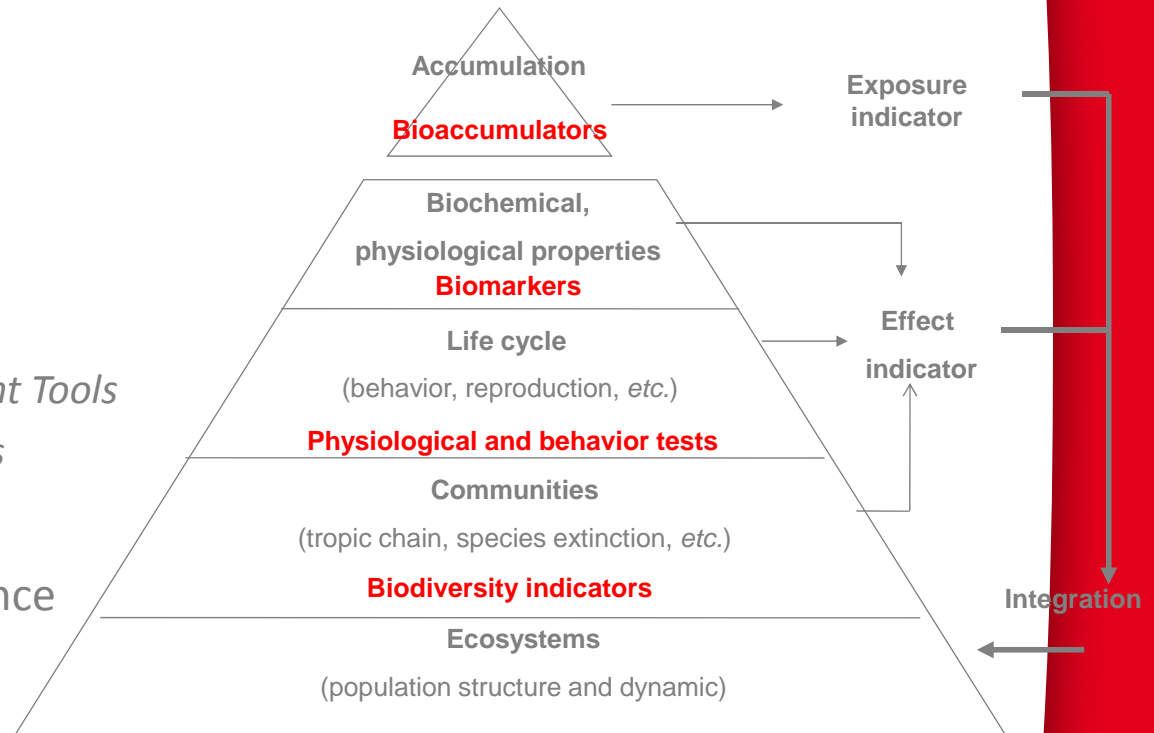

- **French Guidelines:** 2 major criteria :

- The plant's Effluent Flow + Vulnerability of Receptor Environment

- **Veolia Priorities**

- Test and Adapt the Guidelines
- Realize on-site testing
- Select and combine
 - *Physicochemical Assessment Tools*
 - *Biological Assessment Tools*
- Tailor-made the EIA plan
- Validate our WWTP performance

- **Appropriate Monitoring & EIA Best Practice**
